01 Abstract

Little meme. Big Dream. Welcome to KISHU...

KISHU INU was created in April 2021 with the goal of being a decentralized meme project with true purpose.

KISHU's mission is to bring popular cryptocurrency concepts to the mainstream. Unlike older, comparable projects, KISHU introduces holders to next-gen concepts such as frictionless yield, NFTs, decentralized exchanges, and more.

Within the first month of its launch, KISHU made history by surpassing a \$2 billion market cap and over 100,000 holders. This was an unprecedented milestone for a project of its kind, and proved the world's belief in the project.

KISHU's list of products includes...

\$KISHU TOKEN

ERC20 token that features a 2% redistribution fee to holders, so every time a transaction occurs, existing holders earn more \$KISHU automatically.

KISHU SWAP

Decentralized exchange that features custom functionality and allows holders to trade any ERC20 token for another.

KISHU CRATE

NFT Marketplace where users can stake Kishu to earn NFTs, we feature artists from community contests and those artists earn a portion of staking fees

KISHU PAW PRINT

Wallet tracker where users can track their passive income earned through \$KISHU, token prices, wallet balance, and more.

KISHU sWAG

Merchandise store to allow KISHU holders to proudly promote KISHU in the real world, with all proceeds supporting KISHU's growth.

02 Values

TRANSPARENCY

We maintain open communication with our holders so they can stay current and informed with every step of KISHU's growth.

COMMUNITY

Ultimately, Kishu is owned by the community, meaning we encourage group efforts related to marketing, development, community management and more.

TRUST

In the cryptocurrency market, Trust is paramount. That means not only providing transparency, but also security related to holder funds. Examples include audits of KISHU's code, and liquidity tokens being burnt to eliminate risk of malicious behavior.

LONGEVITY

KISHU is in it for the long haul. Our plans are for long-term development of the ecosystem which result in a fruitful investment beyond any temporary trends.

03 \$KISHU Token

\$KISHU is an ERC20 token launched on the Ethereum blockchain April 17, 2021.

The max supply is 100 quadrillion and key functionality is its built-in redistribution mechanism. For every transaction (buy or sell), 2% is sent to existing \$KISHU holders as a reward. That means their wallets increase automatically over time.

\$KISHU Token has also completed a [security audit](#) to further holder confidence.

Ecosystem

KISHU SWAP

Launched May 5, 2021, KISHU SWAP is a decentralized exchange (DEX) where users can swap any ERC20 token for another one.

It is powered by Uniswap, the largest and safest DEX in the world and acts as the foundation on which KISHU will develop functionality for KISHU holders.

KISHU PAW PRINT

Coming in June 2021, KISHU PAW PRINT is an app users can use to track their \$KISHU token stats over time.

Stats include passive income earned by holding \$KISHU, total \$KISHU balance and USD value, price charts, and more.

A mobile version is targeted for a summer 2021 release date.

KISHU CRATE

Coming in May 2021, KISHU CRATE is the official NFT marketplace where holders can stake (deposit) their \$KISHU tokens in order to earn exclusive NFTs featured by artists that are part of the KISHU community.

KISHU will hold regular contests for artists to showcase their work and have the community vote on which should be added to the marketplace.

Portions of the fees generated by the NFTs are distributed to the artists, while the rest funds KISHU development.

KISHU SWAG

Coming in June 2021, KISHU SWAG takes KISHU to the mainstream by allowing holders to represent KISHU in the wild with official merchandise.

Holders can pay using cryptocurrency and proceeds support future KISHU development.
